ALPHABETICAL INDEX

Air heaters, iron tube, 108
Air supply required for combustion, 365
Analogy between the flow of gases and the flow of liquids, 3
Annealing furnaces, drop of temperature in, 77
for malleable iron, 116
for plates, 128
for sheets, defective, 52
temperature of waste gases, 79
vertical, 123
Apparatus, experimental, 3
Arch brickwork, formulas and tables for, 176

Balloon, hydrostatic; pressure in, 14
Becker hot-blast stove, 100
Bessemer converters, 183
Blast-furnace gas, combustion of, 316
instantaneous calorific intensity, 319
heat-capacity curve of, 368, 309
mains, hydrostatic pressure in, 24
Boilers, breeching, flow of gases in, 10
settings, 320
steam, 109
suggestions for baffling, 336
waste heat available for, from open-hearth furnace, 295
waste heat on open-hearth furnace, 233
•• waste heat setting for, 236
water circulation in, 331
Brick arches, formulas and tables for, 176.
flues, friction of gases in, 168
Brick kilns, II?
downdraft, *7*
model of, 3
poor design of, 60
regenerative fired, 58
ring or multiple chamber, 116
temperature drop in, 77
temperatures required, 185
up draft, 4
Brick temperature on center lines, 222

Cementation furnaces, 115
Chamber furnaces, 57, 112
Chamber volume of furnaces, 183
Change of area of gas passages, effect of, 35
direction of flow, effect of, 35
Chimneys, draft formulas, 184
hydrostatic pressure in, 25
open-hearth practice, 247
required for open-hearth furnaces, 287
Classification of industrial heating, vii
Coal, pulverized, heat-capacity curve for, 393
Coal tar, heat-capacity curve for, 389 391
Coke-oven gas, heat-capacity curve for, 379
Combustibles, heat released per unit of, 364
Combustion, air supply required for, 365
Combustion and boiler settings, 320
chamber for hot-blast stove, 102
Jf blast-furnace gas, 316
